SUMMARY:

The Department is proposing to add a new section 252:100-37-27, Control of emission of VOCs from aerospace industries coatings operations, for existing or new aerospace vehicle and component coating operations at aerospace manufacturing, rework, or repair facilities. The new section would allow aerospace coating facilities throughout Oklahoma to be regulated under rules specific to the industry as is presently done in section 252:100-39-47 for Tulsa County. Currently, VOC emissions from coating operations at any type of industry are regulated under 252:100-37-25. The new section would reference certain limits set forth in the aerospace National Emissions Standards for Hazardous Air Pollutants (NESHAP) 40 CFR Part 63, Subpart GG, which are more applicable for this particular industry than the current generic list in 252:100-37-25. Additionally, the Department is proposing to amend 252:100-39-47 to correct minor typographical errors, incorporate the latest changes to the aerospace NESHAP, and ensure regulatory consistency with proposed section 252:100-37-27. Lastly, the Department is proposing to revoke Appendix N and replace it with a new Appendix N to correct minor typographical errors and specify its intended use for both sections 252:100-39-47 and 252:100-37-27.

The gist of this rulemaking (252:100-37-27, 252:100-39-47, and Appendix N) is to provide the aerospace industry with updated requirements that better reflect current aerospace industry coating formulations and practices, and to make those rules applicable statewide. This rulemaking would ensure the aerospace industry in Oklahoma has the opportunity to operate as necessary with standards specific to the industry and consistent with rules already in place for Tulsa County to reduce the formation of ozone.

The Department is proposing to amend 252:100-39-4, Exemptions, to remove an incorrect citation to a revoked rule. The gist of this rulemaking is to remove an incorrect citation to a revoked rule.

The Department is proposing to amend 252:100-39-16, Petroleum refinery process unit turnaround, to update the timeframe listed as the non-oxidant season. The gist of this rulemaking is to ensure that the proper controls are used during scheduled refinery unit turnarounds during Oklahoma's current ozone season.
