

**TITLE 252. DEPARTMENT OF ENVIRONMENTAL QUALITY
CHAPTER 616. INDUSTRIAL WASTEWATER SYSTEMS**

SUMMARY OF COMMENTS AND RESPONSES

COMMENT PERIOD: December 1 through December 31, 2012

COMMENT: AEP/PSO - Maintaining recordkeeping regarding the application of wastewater being used as dust suppressant at the facility generating the wastewater is of no value to DEQ. The facility suggested adding language in OAC 252:616-11-6 to exempt these types of facilities from these recordkeeping requirements.

RESPONSE: OAC 252:616-11-6 was not included in the notice of rulemaking intent and is not available for amendment at this time. DEQ staff does believe the records are necessary to complete a water balance to determine if excessive water losses are occurring. DEQ is willing to meet with representatives of AEP/PSO to discuss their recordkeeping concerns.
